

NOTES

April 26, 2020

Our sun is 93 million miles away. 92 million miles away then no life on earth. 94 million miles away no life on earth.

The earth has a 5% tilt at all times. If there was no tilt than one side of the earth would always be facing the sun causing no life to exist. The other side would never see the sun causing no life to exist. Less or more tilt than the same would occur.

40% of the sun creates the tilt because of its distance from the earth. The other 60% of the tilt is from the moon. The exact distance and existence of the sun and moon is why we are able to have life on this earth.

.007 of hydrogen must convert its mass to helium to sustain life.

There is 21% oxygen in our atmosphere. Any other percentage at all then we would have no life.

3.4% salt is in the ocean which is the exact same amount of salt in the human bloodstream. Any different % than no life on earth.

"The Lord said to Moses, "Come up to me on the mountain and stay here, and I will give you the tablets of stone with the law and commandments I have written for their instruction."

Exodus 24:12 NIV

We tend to only look for God in certain places and only at certain times.

Fool says in his heart "There is no God." They are corrupt, their deeds are vile; there is no one who does good.

Psalm 14:1 NIV

Are your eyes open enough to see Him?
